

Freifunk-Open-MPPT

(MPPT: Maximum Power Point Tracker)

A small MPPT solar charger (up to 50 watts of module power) with deep discharge protection and serial communication for monitoring and controlling the system
(Image: Serving Suggestion)

Solar charger & measurement data acquisition for resilient and energy autonomous wireless mesh nodes.

Increased energy yield through Maximum Power Point Tracking

Image:
Mobile Freifunk mast

Some applications for energy independent mesh nodes

- * Refugee camps**
- * Resilient communication infrastructure / networks in crisis and disaster situations**
- * Informal settlements in developing countries (controller provides electricity for smartphone, tablet, light, radio,... and mesh node on the roof)**
- * Community network nodes at elevated locations without current, e.g. Barn roof, on the hill / mountain between two places that blocks the Fresnel zone**
- * General purpose solar charger**
- * You name it.**

Special features of the Freifunk-Open-MPPT:

- * AVR-GCC Source code for μ C firmware under GNU-GPL
- * Open source CAD files for KiCAD (open-source -CAD program for Linux, Mac, Windoze)
- * MPPT design of the solar controller increases energy yield (94.5% efficiency)
- * Communicates operating data via serial RS232 interface (3.3 volt level) e.g. To the connected router with the mesh network
- * Uses only proven and easily available standard components
- * Board layout, which allows the two-layer PCB in the DIY process itself (Milling or etching in the maker space on only one board side)
- * Microprocessor-controlled: AVR ATmega8 with 1kByte RAM and 8kByte Flash (!)
- * Firmware update via serial interface and bootloader, easy to do via serial upload (cat main.hex > / dev / tty ***) within 8 seconds after activating the power supply

MPPT – what?!

Electric power in watts is voltage times Power:

Watt = Volt * Ampere

Battery voltage = 11.3 - 14.9V

50 Watt Solar module at MPP:

50 W = 18V * 2.77A

50 Watt solar module
connected to 12 V battery
voltage without MPPT:

33.24 W = 12 V * 2.77 A

50 Watt Solar module with
Freifunk-Open-MPPT (94.5%
efficiency):

47.12 W = 18V * 2.77A * 0.945

50 W solar module specs:

Model:Eco Line ES50M36		
Rated Max Power(Pmax)	(W)	50
Power Tolerance Range	(%)	0/+3
Voltage at Pmax(Vmp)	(V)	18.0
Current at Pmax(Imp)	(A)	2.77
Open-circuit Voltage(Voc)	(V)	22.32
Short-circuit Current(Isc)	(A)	2.97
Normal Operating Cell Temp(NOCT)	(°C)	50
Maximum System Voltage(VDC)	(V)	1000
Dimension	(mm)	661×521×25
Cell quantity and array		36(4×9)
All technical data at STC: AM=1.5 E=1000W/m ² Tc=25°C		
 WARNING-ELECTRICAL SHOCK HAZARD		
This photovoltaic Module produces electricity when exposed to light. Follow all applicable electrical safety precautions.
