These are estimations

What went good

Positive feedback from the community meeting:
https://pad.gresille.org/p/wbmv12

- the livestream is awesome <3
- schedule was awesome (even if a bit late)
- the socialisation part
- open schedule / lightning talks
- welcome feeling
- travel grants
- inter-generation, inter-culture, inter-continental

What went not so good

Also feedback from the community meeting:

- testbed was not really ready for the testing
- no permanent testbed
- we need more open view of what's happening (who's working on what?)
- difficult to work on the testbed *and* follow the presentations all day
- maybe some people have a too big gap of knowledge
- too open? Missing "directions" for newcomers
- too much noise during the conferences

Fiber

Fiber

Internet access for the event

- Dedicated fiber brought into the building by Ielo-Liazo
- 400 meters of fiber deployed below the street, one day of work
- Added wiring in the building to bring network upstairs
- 1 Gbps Internet access, thanks to Gitoyen
- The fiber will possibly be used for future projects with the 6b!
