

What is Battlemesh

- Event that aims at bringing together people from across the world to test the performance of different routing protocols for ad-hoc networks
- started in Paris (FR) in 2009, then Brussels (BE), Bracciano (IT), San Bartolomeu del Grau (CAT), Athens (GR), Aalborg (DK), Leipzig (DE), Maribor (SI), Porto (PT), Vienna (AT), Berlin (DE), Saint-Denis (FR)
- 2020 Virtual Global Edition
- Rome (IT) 2022

Why Rome

- Proposal by RomHack Camp organizers to do a joint event
- Uncertainty about the pandemic situation
- WBM in Rome has easy logistics: well connected with free (as in freedom and as in beer) location
- Local ninux.org community network

ninux.org & Fusolab

- Fusolab has been ninux.org headquarter since the early 2000s
- Intersection between people from ninux.org and people from fusolab
- Participation to Wireless BattleMesh v3

The neighborhood

- We are in the Alessandrino neighborhood, Fusolab aims to bring culture, art, sports, education and more in a place where aggregation spaces are lacking

Streaming

- From the Battlemesh YouTube channel
<https://www.youtube.com/channel/UCNZfMF6AQoPvRL1Nc1kol5g>

RomHack Camp

- September 23-25

WIRELESS BATTLEMESH

The Wireless BattleMesh is an event that aims at bringing together people from across the world to test the performance of different routing protocols for wireless ad-hoc networks and talk about related topics. It is a tournament with a social character. If you are a mesh networking enthusiast, community networking activist, or have an interest in mesh networks you might want to check this out!

For 2022, the event will be held in Rome, September 19-22, just before RomHack Camp! More information on www.battlemesh.org
